## FRONT - END DEVELOPER

**Email:** vocongnam172@gmail.com

**Phone:** 0347587212

**Address:** Tam Phu Ward, Thu Duc City, HCM City

**Website:** <https://namvo.vercel.app>

---

## SUMMARY

I am a passionate Front-End Developer with a strong foundation in HTML, CSS, JavaScript, React.js, and modern web technologies. While I previously interned as a GIS Developer at the Institute of Information Technology, my true interest lies in creating seamless, interactive web experiences. I am currently developing an E-Commerce Website as my thesis project, integrating a Customer Support Chatbot and Recommendation System. I am eager to contribute my skills and grow in a professional Front-End role.

---

## WORK EXPERIENCE

**Intern, VIỆN CÔNG NGHỆ THÔNG TIN BQP CƠ SỞ 2**

*Oct 2024 – Dec 2024*

- Developed a tool using Python and PyQGIS to allow users to draw and edit symbols freely on the map without QGIS.
  - Worked in a team to design and implement the user interface for loading and interacting with maps.
  - Coded the UI and functionalities for symbol manipulation, including drawing and editing tools.
  - Completed 90% of the project compared to the initial requirements.
- 

## EDUCATION

**Bachelor of Information Systems, Nong Lam University - Ho Chi Minh City**

*Expected Graduation: August 2025*

---

## PERSONAL PROJECTS

**Thesis on "Designing an E-Commerce Website for Selling Cakes and Tea with Integrated Customer Support Chatbot and Recommendation System". ( January 2025 - March 2025)**

- Developed the Front-End using modern UI frameworks (Bootstrap, Tailwind CSS).
- Implemented a PHP & MySQL back-end for product management and user authentication.
- Integrated an AI-powered chatbot for customer support. Built a Product Recommendation
- System using Python, analyzing product descriptions and user preferences to suggest relevant items.

## Vietnam Travel Website Project ( March 2025 - April 2025 )

- Frontend: Developed a responsive UI using Next.js, React, Tailwind CSS, and shadcn/ui. Implemented dynamic routing, server-side data fetching, and a mobile-friendly navigation system.
  - Backend: Built RESTful APIs with Next.js API Routes, utilizing Server Components for improved performance and SEO.
  - Database: Integrated MySQL with connection pooling to manage destinations, tours, bookings, and testimonials.
- 

## TECHNICAL SKILLS

**Programming Languages:** HTML, CSS, JavaScript, PHP, Python, MySQL.

**Web Development:** React.js, Next.js , TypeScript, Tailwind CSS, Bootstrap, Ant Design.

**Tools:** Git.
