SUMMARY

I am a passionate Front-End Developer with a strong foundation in HTML, CSS, JavaScript, React.js, and modern web technologies. While I previously interned as a GIS Developer at the Institute of Information Technology, my true interest lies in creating seamless, interactive web experiences. I am currently developing an E-Commerce Website as my thesis project, integrating a Customer Support Chatbot and Recommendation System. I am eager to contribute my skills and grow in a professional Front-End role.

WORK EXPERIENCE

Intern, VIỆN CÔNG NGHỆ THÔNG TIN BQP CƠ SỞ 2   *Oct 2024 – Dec 2024*

- Developed a tool using Python and PyQGIS to allow users to draw and edit symbols freely on the map without QGIS.
- Worked in a team to design and implement the user interface for loading and interacting with maps.
- Coded the UI and functionalities for symbol manipulation, including drawing and editing tools.
- Completed 90% of the project compared to the initial requirements.

EDUCATION

Bachelor of Information Systems, Nong Lam University - Ho Chi Minh City
Expected Graduation: August 2025

- Relevant coursework: Web Application Development, Database Systems.
- Thesis on "Designing an E-Commerce Website for Selling Cakes and Tea with Integrated Customer Support Chatbot and Recommendation System".
  - Developed the Front-End using modern UI frameworks (Bootstrap, Tailwind CSS).
  - Implemented a PHP & MySQL back-end for product management and user authentication.
  - Integrated an AI-powered chatbot for customer support. Built a Product Recommendation
  - System using Python, analyzing product descriptions and user preferences to suggest relevant items.
